WORLDCEM STERHAND 100 HAND AND SKIN DISINFECTANT

Approved by the Ministry of Health, our Biocidal Certified product is effective against viruses and bacteria. It is a hand disinfectant with 70% isopropyl alcohol content and does not require rinsing. Thanks to the Chlorhexidine substance in its content, it continues to protect after use in the applied area. It is easy to use, dries quickly. It does not dry the skin with Glycerin in its formulation. Its active ingredients do not cause allergic and toxic effects. It can be used easily even in allergic bodies.

Usage: It is used as anhydrous. Pour 1-2 ml of WORLDCEM-STERHAND 100 into your palm and rub well. Do not rinse.

5/10/20/30 L

SCHOOL & OFFICE

WORLDCEM WORLDLEAN ANTIBACTERIAL SURFACE CLEANER

It is used in the cleaning of goods, equipment and furniture in public and personal areas, in the cleaning of walls, floors, floors and surfaces in schools, mosques, social facilities, in the cleaning of floor surfaces and equipment in medical areas (clinics, hospitals), on polymeric surfaces, metal surfaces by creating a hygienic effect for antibacterial purposes. It is active for 1 minute for bacteria.
*Kills 99.9% of analyzed bacteria.

Usage: It is used pure.

5/10/20/30 L

WOODWORK AND FURNITURE CHEMICALS

WOODWORK AND FURNITURE CHEMICALS

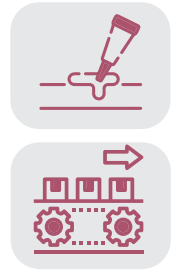

WORLDICHEM DLM 200 ADHESIVE REMOVER

It is used to clean the glue on the sliding tapes. In particular, it cleans the adhesives on the bottom layer of diapers and pads and reduces the adhesion effect of the next batch. With its lemon odor feature, the bad odor left by the solvent does not absorb into the material.

How to use: It is used pure.

5/10/20/30 L

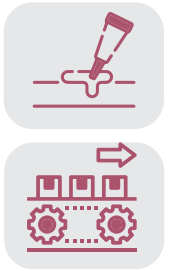

WORLDICHEM DLM 203 ADHESIVE REMOVER

It is used to clean the glue on the sliding tapes. In particular, it cleans the adhesives on the bottom layer of diapers and pads and reduces the adhesion effect of the next batch. With its lemon odor feature, the bad odor left by the solvent does not absorb into the material.

How to use: It is used pure.

5/10/20/30 L

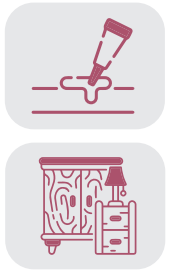

WORLDICHEM HKN MACHINE ADHESIVE REMOVER

It is used as an outlet solvent, especially in machine systems where furniture coating is performed, to remove the softened glue residues on the final product.

How to use: It is used pure.

5/10/20/30 L

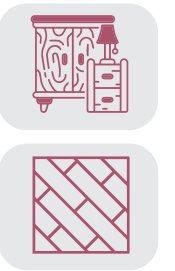

WORLDICHEM STM CHIPBOARD CLEANER

It is used as an outlet solvent, especially in machine systems where furniture coating is performed, to remove the softened glue residues on the final product.

How to use: It is used pure.

5/10/20/30 L

WORLDICHEM SOFT 100 ADHESIVE SOFTENER CHEMICAL

It is used as an input product especially in machine systems where furniture coating is done. It is used to soften the glue overflowing from the edges after the Jumbo adheres to the chipboard passing through the machine. It is also a chemical that can be used as aluminum cutting fluid.

How to use: It is used pure. It is not flammable.

5/10/20/30 L

WATER FACTORIES

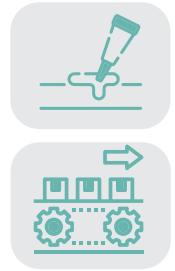

WATER FACTORIES

WORLDCHEM DAP 1000 BOTTLE DETERGENT

It is used at a concentration of 0.5-1 in 100. It is diluted with water, rinsed. It is used with soft and hard waters. Better results are obtained when cleaning in a hot environment or diluting with hot water.

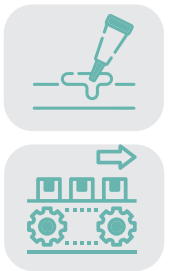

5/10/20/30 L

WORLDCHEM ACC STRONG ACIDIC LIQUID CLEANING AGENT CONSISTING OF A MIXTURE OF INORGANIC ACIDS USED IN HEAT EXCHANGERS IN THE MILK AND BREW INDUSTRY

It is used for cleaning paterosator, separator, stainless steel and ropes. Cleaning is generally done periodically with acidic alkaline. How to use: It is circulated at 0.5-2% concentrations at 60 °C for 20-25 minutes.

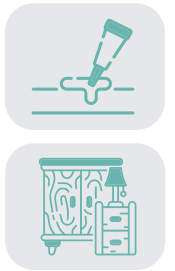

5/10/20/30 L

WORLDCHEM DMC 300 BOTTLE CLEANER

It cleans food and all other surfaces. It is easy to use. Does not leave residue. It is diluted 1: 10 to 1:50. Mix with water and apply to thoroughly wet the surface. Praticice is routinely done to maintain control. It is rinsed with plenty of water.

5/10/20/30 L

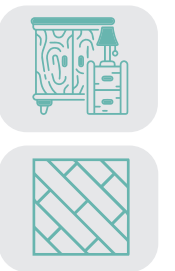

WORLDCHEM FL CONCENTRATED SEDIMENT AND LIME REMOVER

It is a highly concentrated acidic cleaner used to remove lime, mineral deposits, algae and rust, especially in heating and cooling systems. It dissolves the lime by absorbing it in ionized form. Contains inhibitors that do not harm metal surfaces.

How to use: It is diluted with water at a rate of 1/10 according to the density of sediment and lime.

5/10/20/30 L

WORLDCHEM HND CLEANNING LIQUID SOAP

While it cleans the skin without drying it with its soft formula, the glycerin in its content softens and nourishes the skin. pH: 5.5

5/10/20/30 L

WATER FACTORIES

WORLDCHEM CTA CLEANING LIQUID SOAP

While it cleans the skin without drying it with its soft formula, the glycerin in its content softens and nourishes the skin. pH: 5.5

5/10/20/30 L

WORLDCHEM CT LIQUID HAND SOAP

It is a pleasant-smelling, glycerin, economical liquid hand soap. Ph: 5.5.
How to use: It is used pure.

5/10/20/30 L

WORLDCHEM SP SOLVENT-FREE OIL REMOVER

It is a solvent and odor-free, non-combustible oil solvent product that can be safely used in the maintenance departments of factories that produce food. There are two versions, with and without foam.
How to use: It is used by diluting with water at a ratio of 1 to 20 on average.

5/10/20/30 L

CONSTRUCTION - POST- CONSTRUCTION CHEMICALS

CONSTRUCTION - POST-CONSTRUCTION CHEMICALS

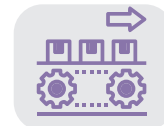

WORLDCHEM CR SUPER CONCENTRATED MORTAR AND CONCRETE REMOVER

It cleans mortar, lime and concrete residues after construction easily and perfectly. It also easily cleans mortar, concrete and cement residues from cement silos, transmixers, concrete pumps and concrete mixers. It does not damage the applied surface, prolongs the life of the machines

How to use: It is diluted with water at a rate of 1/5 according to the thickness of the deposits.

5/10/20/30 L

WORLDCHEM MN MINERA SEDIMENT SOLVENT

It is effective in cleaning very heavy dirt. It dissolves mineral deposits, silicon residues and rust stains formed in places where water accumulates.

How to use: It is used by diluting with water at a ratio of 1/10 to 1/25.

5/10/20/30 L

WORLDCHEM SHN CONCENTRATED TILE AND TOILET CLEANER

Multifunctional concentrated tile, bathroom and toilet cleaner. It disinfects the used surface by reducing toilet odors, removes stubborn stains, mossy layers in toilets, soot, soap marks, lime and water stains, and polishes the surface. Especially in metals such as brass and copper, it takes oxidation and provides shine.

How to use: It is used by diluting it with 1 to 5 water.

5/10/20/30 L

WORLDCHEM EL MOISTURE, DIRT, OIL AND RUST CLEANER FOR ELECTRIC APPLIANCES

It is an insulating solvent used for cleaning electric motors and components without disassembly and removing moisture. It is sprayed on the contactors and motor windings until all dust, oil, rust and moisture are gone. It evaporates fast.

Usage: It is applied directly to the surface.

5/10/20/30 L

WORLDCHEM BSJ GEL PAINT REMOVER

It is a specially formulated product to remove even the most difficult paint stains. Thanks to its special formulation and gel consistency, it provides easy and fast cleaning. It removes paint stains on vertical surfaces by clinging to the stain thanks to its dense consistency.

Usage: It is used pure.

5/10/20/30 L

CONSTRUCTION - POST-CONSTRUCTION CHEMICALS

WORLDCEM FLX EXTRA SEDIMENT, LIME AND RUST REMOVER

It is a specially formulated product to remove even the most difficult paint stains. Thanks to its special formulation and gel consistency, it provides easy and fast cleaning. It removes paint stains on vertical surfaces by clinging to the stain thanks to its dense consistency.

Usage: It is used pure.

5/10/20/30 L

WORLDCEM HT ADHESIVE CLEANER

The label is used to remove adhesive residue. It is used pure.

5/10/20/30 L

WORLDCEM YKR STAINLESS STEEL - CHROME CLEANER AND POLISHER

It is a product used for polishing stainless steel and chrome parts. While it provides shine with the raw materials it contains, it also protects the surface on which it is applied against external factors.

How to use: The product is used pure.

5/10/20/30 L

TEXTILE

TEXTILE

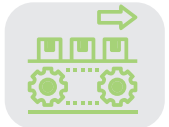

WORLDCHEM STSP TEXTILE STAIN REMOVER

It is effective on oil, dirt, grease and other stains on the fabric in the textile industry. There are product alternatives depending on the applied fabric and stain feature.

How to use: It is used pure

5/10/20/30 L

WORLDCHEM HT SHADE CLEANER

It is effective in cleaning the moires and shades on fabric and fiber in the textile sector.

Usage: It is used pure.

5/10/20/30 L

WORLDCHEM INVOLAN

It is a dye remover that can be used in the textile and yarn industry. 1 unit of product is diluted with

5/10/20/30 L

WORLDCHEM STK TEXTILE STAIN REMOVER

It is effective on oil, dirt, grease and other stains on the fabric in the textile industry. There are product alternatives depending on the applied fabric and stain feature.

How to use: It is used pure.

5/10/20/30 L

WORLDCHEM TPX TEXTILE RUST REMOVER

It is effective in cleaning rust stains on textile products. It does no harm. Usage: It is used pure by spraying or dipping method. It needs to be rinsed afterwards.

5/10/20/30 L

TEXTILE

WORLDCHEM DSL LAUNDRY HEAVY DIRT AND OIL SOLVENT

It is a product specially produced for industrial type washing machines used in laundries. It is specially formulated for cleaning oil stains on laundry. It gives excellent results at any temperature.

Usage: It is washed by adding 50-100 gr for 1 kg of dry laundry in the washing machine

5/10/20/30 L

WORLDCHEM DMX CONCENTRATED STAIN AND OIL REMOVER MACRO

It is a multifunctional and economic product that meets all deodorization and cleaning needs. It can be used on metal, concrete, glass, many plastic surfaces, vinyl, formica, mosaic, wood coating and other water-washable surfaces. Usage: It is used by spraying once or twice according to the density of the dirt on the surface, waiting for 5 minutes and wiping with the help of a cloth, sponge or brush.

5/10/20/30 L

FACTORY

FACTORY

WORLDCHEM SL OIL REMOVER INDUSTRIAL SOLVENT

It is a powerful degreaser that cleans especially dried, tarry oil and grease. It is not flammable. It is economical. It is effective in cleaning forklift and tire tracks on operating floors.
Usage: It is diluted with water between 1/4 and 1/20 according to the density of dirt and oil.

5/10/20/30 L

WORLDCHEM SP SOLVENT-FREE OIL REMOVER

It is a solvent- and odor-free, non-flammable oil solvent product that can be safely used in the maintenance departments of factories that produce food. There are two versions, with and without foam.

Usage: It is used by diluting with water at a ratio of 1 to 20 on average.

5/10/20/30 L

WORLDCHEM TYT STRONG OIL CLEANER

It is an alkaline product developed especially for dried and tarry oils. Garbage containers are effective in removing heavy dirt and oil layers in hotel kitchens. It is also used safely in pre-filling washing processes in tube filling facilities. The chemicals it contains are formulated in a way that does not burn the skin.
Usage: 1 unit of product is diluted with 5-20 water. It is sprayed on the surface to be cleaned, wait a few minutes, and the oil and dirt that is dissolved is wiped off with a clean cloth.

5/10/20/30 L

WORLDCHEM ET METAL SURFACE PROTECTION AND PHOSPHATE PRODUCT

It is a metal surface protection and phosphating product. In industry, it ensures that metal surfaces are cleaned and protected against corrosion before painting, and that the paint adheres to the surface more effectively.

Usage: It is used by diluting 1:1 to 1:1 with water. The temperature of the dilution water must be 50 - 60°C in order to form a more effective phosphate layer.

5/10/20/30 L

WORLDCHEM ETX3 METAL SURFACE PROTECTION AND PHOSPHATE PRODUCT

It is a metal surface protection and phosphating product. In industry, after degreasing metal surfaces and cleaning before painting, it protects the metal against corrosion and ensures that the paint adheres to the surface more effectively.

Usage: It is used by diluting with water between 1:1 and 1:1.

5/10/20/30 L

FACTORY

WORLDCHEM MT METAL SURFACE PREPARER

It cleans the rust, oil and grease from the metal surface in one application and prepares the metal surface for paint and coating. It abrades the metal microscopically and creates a phosphate layer on the surface that enables better adhesion of paint and coating. Usage: It is used by diluting 1:5 with water.

5/10/20/30 L

WORLDCHEM RS PENETRATOR AND SOLVENT

It loosens stuck, rusted bolts, nuts, fasteners, tools and equipment that have become rusty due to not being used for a long time, making them reusable in a very short time. In addition to its relaxing feature, it has cleaning, lubricating and anti-rust properties. Usage: It is used pure.

5/10/20/30 L

WORLDCHEM FL CONCENTRATED SEDIMENT AND LIME REMOVER

It is a highly concentrated acidic cleaner used to remove lime, mineral deposits, algae and rust, especially in heating and cooling systems. It dissolves the lime by absorbing it in ionized form. Contains inhibitors that do not harm metal surfaces. Usage: It is diluted with water at a rate of 1:10 according to the density of sediment and lime.

5/10/20/30 L

WORLDCHEM FLX EXTRA SEDIMENT, LIME AND RUST REMOVER

It is an acid type product that safely removes cement, lime, sediment residues and rust thanks to its special formula. It cleans grout deposits on metal surfaces without damaging the paint. Usage: It is diluted with water at a ratio of 1:20 according to the density of sediment and lime.

5/10/20/30 L

WORLDCHEM BSJ GEL PAINT REMOVER

It is a specially formulated product to remove even the most difficult paint stains. Thanks to its special formulation and gel consistency, it provides easy and fast cleaning. It removes paint stains on vertical surfaces by clinging to the stain thanks to its dense consistency. Usage: It is used pure.

5/10/20/30 L

FACTORY

WORLDCHEM BS PAINT REMOVER

It is a specially formulated product to remove even the most difficult paint stains. Thanks to its special formulation, it provides easy and fast cleaning. It dries quickly. It does not leave marks or stains.

Usage: It is used pure.

5/10/20/30 L

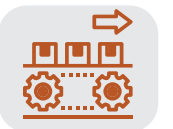

WORLDCHEM STSP TEXTILE STAIN REMOVER

It is effective on oil, dirt, grease and other stains on the fabric in the textile industry. There are product alternatives depending on the applied fabric and stain feature.

How to use:

It is used pure.

5/10/20/30 L

WORLDCHEM INX INOKS SURFACE CLEANING AND RENEWAL PRODUCT

It is an inox surface cleaning and renewal product that can be used safely on inox, chrome and stainless steel surfaces in the manufacturing industry, hotels and restaurants. It easily cleans the corrosion and dirt stains caused by humidity and environmental pollution. Removes fingerprint stains. It cleans superficial traces, stains and rusts.

Usage: It is used by diluting with water at a ratio of 5:10.

5/10/20/30 L

WORLDCHEM RSF SUPER CONCENTRATED RUST AND CORROSION PREVENTIVE

It is a rust and corrosion preventive product added to the circulation water in closed circuit circulation systems, cooling towers or steam boilers. It prevents the formation of bacteria in the machines that process with boron oil. It is economical, it is used by diluting with a very high rate of water, it does not require rinsing. It does not contain acid compounds. Usage: It is used by diluting with water between 1:60 and 1:100.

5/10/20/30 L

WORLDCHEM GR PROTECTIVE OIL FOR IRON AND ALLOYS

It is a mineral mixture containing anti-corrosive and antibacterial chemicals and film-forming polymers. Especially after a neutral or acidic cleaning is done on the machines and spare parts or molds obtained in workshop-type workshops, by applying this oil, rust does not occur on the surface for a long time. It quickly forms a homogeneous, thin and permanent film on the surface. This oil film prevents the material from rusting under suitable storage conditions.

5/10/20/30 L

FACTORY

WORLDCHEM SDT CHROME CYLINDER CLEANER

It easily cleans the plastic traces stuck on the cylinder in the automotive sub-industry. WORLDCHEM-SDT product is used by diluting 1:10 with water. After the product is diluted, it is sprayed on the surface to be cleaned, after waiting for 1-2 minutes, it is rinsed with water and dried. It must be used with hot process.

5/10/20/30 L

WORLDCHEM SLE OIL AND DIRT REMOVER

It is an alkaline product specially developed for heavy dirt and oil stains and can be used safely on painted surfaces. Does not contain caustic. It can be used safely on all kinds of surfaces in kitchen equipment, food companies.

Usage: 1 unit of product is diluted with 10-50 units of water. After spraying on the surface to be cleaned, wait a few minutes and wipe the dissolved oil and dirt with a clean cloth.

5/10/20/30 L

WORLDCHEM SLR SOLAR PANEL CLEANER

The cleaning solution is specially produced for the cleaning of solar panels. It cleans the panels that are polluted by intense exposure to various external factors such as bird droppings, dust, cement dust, pollen. It is diluted 1:70 - 1:100.

5/10/20/30 L

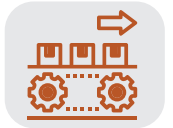

WORLDCHEM MC MECHANICAL PARTS CLEANER

It is a product developed for cleaning mechanical parts and removing oil and dirt from all kinds of sensitive equipment. It also removes wax, asphalt, ink and other depositing stains. It does not corrode metal. It cleans without damaging plastic, rubber and dyestuff. It leaves no residue on the surface.

Usage: It is used pure.

5/10/20/30 L

WORLDCHEM EL MOISTURE, DIRT, OIL AND RUST CLEANER FOR ELECTRIC APPLIANCES

It is a product developed for cleaning mechanical parts and removing oil and dirt from all kinds of sensitive equipment. It also removes wax, asphalt, ink and other depositing stains. It does not corrode metal. It cleans without damaging plastic, rubber and dyestuff. It leaves no residue on the surface.

Usage: It is used pure

5/10/20/30 L

FACTORY

WORLDCHEM ELK ELECTRONIC CARD CLEANER

It is a cleaning product that can be used safely in the cleaning of electronic circuit boards. It easily cleans the dust and dirt on the cards to be cleaned.
Usage: It is used pure

5/10/20/30 L

WORLDCHEM ZS MECHANICAL DEGREASING

Removes oil, wax, asphalt, glue, ink and other depositing stains. It provides perfect cleaning in vehicle parts. It gives excellent results from manual cleaning on the production line or bench to removing the oil in the tank. It does not harm when applied directly on many insulation materials such as hard plastic, rubber, dyestuff. Thanks to its slow evaporation feature, when used in wet tanks, it evaporates in a shorter time than any other solvent used. It is used in tank cleaning by wiping with a spray or brush or by spraying.
Usage: Used pure.

5/10/20/30 L

WORLDCHEM CS HEAVY OIL, GREASE AND TAR SOLVENT

It is a heavy oil, grease, tar and wax remover product. Thanks to the emulsion it creates when diluted with water, it clings to vertical surfaces and stays on the surface until it absorbs oil and dirt. It dissolves without rubbing. It does not contain chlorinated solvent, acid, alkali. It does not produce steam.
Usage: It is used by diluting 1:4 with water. It gets consistency after dilution.

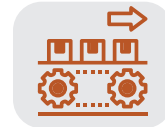

5/10/20/30 L

WORLDCHEM BK1 BELT SLIDER

It is a foam adjustable belt slider containing organic fatty acids and amine soaps in the food industry. It can be applied safely on all types of tapes in dipping, dropper and manual apparatus. Long chain lines are recommended to be used with more sliders than short chain lines.
Usage: If there are droppers in the systems, it is necessary to work at a concentration of 30-50%. In manual applications, it must be used in lower concentrations.

5/10/20/30 L

WORLDCHEM BRG ALUMINIUM CLEANER AND POLISHER

It is an acidic compound-free cleaner developed for cleaning/polishing aluminum coils, radiators and cores. It dissolves aluminum oxide and oil and dirt layers that prevent heat transfer and cause blockages.
Usage: It is used by diluting with water at a ratio of 1:3.

5/10/20/30 L

MARINE

MARINE

WORLDCHEM BOAT CLEANER

It is a product developed for the purification of oil, dirt and rust stains in all marine vehicles. It is also effective in yellowing caused by the sun. It is used by diluting

1/5/10/20/30 L

WORLDCHEM BOAT SHAMPOO WITH POLISHER

With its foam-free formula, it provides excellent boat cleaning and does not damage the wax polish. Used on fiberglass, glass, plastic, metal surface. It is applied by diluting.

1/5/10/20/30 L

WORLDCHEM AGENT POLYESTER CLEANER

It is used for polyester parts on boats. It is used pure.

1/5/10/20/30 L

WORLDCHEM ANTI ODOR

It is used as an odor remover. It does not harm the environment and the user.

1/5/10/20/30 L

WORLDCHEM RUST REMOVER

Thanks to the special acids it contains, it has rust, lime and algae remover properties. It can be used safely in machine rooms. It is applied by diluting.

1/5/10/20/30 L

MARINE

WORLDICHEM SLT BILGE CLEANER

It cleans the oil, grease, soot and fuel residues in the bilge and eliminates bad odors. It does not harm plastic, metal, varnished parts. Does not contain solvent. It is used by diluting.

1/5/10/20/30 L

SHIP CHEMICALS

SHIP CHEMICALS

WORLDCEM BSP MULTI-PURPOSE DECK CLEANER DISINFECTANT

It is a disinfectant product used for cleaning all kinds of oil and dirt stains. Contains strong alkaline agents and surfactants. It provides disinfection while providing a perfect cleaning.

How to use: Since it is a concentrated product, it is used by diluting it with water at a ratio of 20:50 for daily cleaning

5/10/20/30 L

WORLDCEM CHLORINE TABLET EFERVESAN TABLET CHLORINE

It is a product that disinfects water in systems that are not used as sewage, bilge, waste water and drinking water. It is the most economical disinfection method.

How to use: It is used by adding half - 1 tablet of chlorine to a 5 ton boiler.

5/10/20/30 L

WORLDCEM SLT BILGE CLEANER

It is a product used for cleaning oil and fuel oil accumulated in machines, tanks and bilge tanks. Thanks to its intensive formulation, it provides effective and permanent cleaning.

How to use: It is used by diluting with water between 1 and 10 according to the density of the dirt.

1/5/10/20/30 L

WORLDCEM STONE ACID

It is used to clean scale and corrosion deposits formed by water in heating systems. It easily cleans lime and wrinkles with its acidic formulation.

How to use: According to the thickness of lime and cork, a dilution of 1:20 is made.

5/10/20/30 L

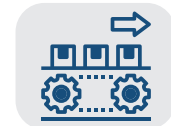

WORLDCEM HKT AIR COOLER CLEANER

It dissolves the oil and dirt layers and aluminum oxide that cause blockages and destroys the elements that prevent heat transfer. With its alkaline structure, it easily removes all deposits.

How to use: It is used by diluting with water at a ratio of 1:2-5.

5/10/20/30 L

SHIP CHEMICALS

WORLDCEM LFT TANK CLEANER

It cleans the oil and grease accumulated and tarred in the tanks, provides easy cleaning without rubbing without leaving any stains. Thanks to its strong, basic formula and the surfactants it contains, it provides easy and economical cleaning.

How to use: It is recommended to use hot water while cleaning. It is used by diluting with water at a ratio of 20:50.

5/10/20/30 L

WORLDCEM SLD OIL SOLVENT AND SEPARATIVE

Oil spilled on the sea surface is a product developed as a separator against oil pollution. Thanks to its special formulation, it separates the oil on the surface and is a product with high biodegradability.

How to use: For small amounts of dirt, a solution is prepared with 3 to 5% sea water. It is sprayed in the direction of the wave from the top to the surface where the pollution is, and it is waited for a while.

5/10/20/30 L

WORLDCEM SLY OIL AND GREASE CLEANER

It is used on deck, engine room, bilge tanks, fuel oil contaminated floors. It provides perfect cleaning in the solution of mechanical oil.

How to use: It is recommended to wait 5-10 minutes after brushing, spraying or spraying the dirty surface.

5/10/20/30 L

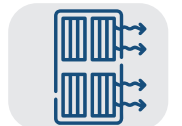

WORLDCEM TRF FILTER CLEANER

It is a powerful degreaser product especially used for cleaning filters. Thanks to its strong alkali formulation, it cleans the filters easily.

How to use: It is used pure or with a dilution up to 1:5 according to the dirt density.

5/10/20/30 L

WORLDCEM RUST REMOVER RUST, LIME AND SEDIMENT REMOVER

It is a special acidic cleaner that is effective on boats, removing rust, lime, silicate and algae. It does not disturb because it does not contain heavy acids such as nitric acid. It can be used safely in machine rooms.

Usage: It can be used directly or diluted with water up to a ratio of 1 to 10. It is applied to the surface. 1-5 min. is expected. It is rinsed with plenty of water.

5/10/20/30 L

Halal Group

HALAL

WORLDCEM SHN CONCENTRATED TILE AND TOILET CLEANER

It is a multifunctional, concentrated tile, bathroom and toilet cleaner. It disinfects the used surface by reducing toilet odors, removes tough stains, mossy layers in toilets, soot, soap marks, lime and water stains, and polishes the surface. It removes oxidation especially on metals such as brass and copper and provides shine.

How to use: It is used by diluting it with 1:5 water.

5/10/20/30 L

WORLDCEM SP HALAL OIL SOLVENT

It is a product that you can use in kitchen armchair and carpet cleaning, and you can remove the most difficult oil stains with its ultra-strong formulation. We have 5, 10, 20, 30 and 60 kg foam and non-foam concentrated products.

How to use: It can be used by diluting between 1:5 and 1:25.

5/10/20/30 L

WORLDCEM WT INTENSIVE BLEACH

It provides perfect cleaning in bathrooms, toilets, sinks and tiles. Thanks to its dense consistency, it clings to the surface it is applied to. It provides disinfection in the environment where it is applied.

How to use: The product is used pure.

5/10/20/30 L

WORLDCEM CMS HALAL BLEACH

It provides perfect cleaning in bathrooms, toilets, sinks and tiles. Thanks to its dense consistency, it clings to the surface it is applied to. It provides disinfection in the environment where it is applied.

How to use: The product is used pure.

5/10/20/30 L

HALAL DISH SOAP

We have a product range of 5,10,20,30 and 60 kg that does not leave stains in an easy-to-rinse hand dishwashing bottle suitable for all economic dishes.

How to use: It is added directly to the washing water depending on the amount of dishes to be washed.

5/10/20/30 L

HALAL

WORLDCEM HALAL FLOWER SCENTED SURFACE CLEANER

With its perfect formulation, it leaves a permanent cleaning and pleasant smell on the surfaces where flower essence is applied. It can be used reliably on all surfaces that are not affected by water. We have a product range of 5, 10, 20, 30 and 60 kg.

How to use: 2 caps are added to 5 liters of water.

1/5/10/20/30 L

WORLDCEM HND200 HALAL ALCOHOL BASED NO RINSE HAND CLEANING LIQUID

It is a specially formulated alcohol-based hand cleaning liquid that does not require rinsing. It does not dry the skin, it softens it. Available for all of skin types.

How to use: Some product is handled, rubbed, not rinsed.

5/10/20/30 L

WORLDCEM FG HALAL SURFACE CLEANSER AND CLEANER

It cleans foodstuffs and all other surfaces it comes into contact with, and helps to remove odor.

How to use: It is used by diluting with water at a ratio of 1:50 to 1:300.

5/10/20/30 L

WORLDCEM FGA HALAL FOOT MAT CLEANING PRODUCT

Cleans foodstuffs, Easy to use. It is active in all kinds of water. Does not require shaking.

How to use: It is used by diluting at a ratio of 1:300

5/10/20/30 L

WORLDCEM FGS HALAL VEGETABLE AND FRUIT CLEANER

Cleans foodstuffs, Easy to use. It is active in all kinds of water. Does not require shaking. It is domestic production. It has Halal and Tayyip certificates.

How to use: It is used by diluting with water at a ratio of 1:300.

5/10/20/30 L

HALAL

WORLDICHEM ANTIBACTERIAL SURFACE CLEANER

In public and private spaces, cleaning of equipment, furniture, disinfecting schools, mosques, social facilities, wall, floor, floor surfaces, and disinfecting medical institutions (clinics, hospitals), cleaning of equipment and polymer-based surfaces, floorings, metal surfaces. It has a strong antibacterial effect desired by high hygiene required areas. Its powerful formula kills 99.9% of known bacteria effectively.

100/500ml 5/10/20/30 L

WORLDICHEM HALAL ALCOHOL BASED HAND AND SKIN DISINFECTANT

It is a powerful hand and skin disinfectant that does not require rinsing and has bactericidal, fungicidal and antiseptic properties. It is easy to use, dries quickly. It is effective against bacteria, fungi and viruses. Does not dry the skin. Available for all skin types.
How to use: It is used pure

50/100/250/500ml 1/5/10/20/30 L

5/10/20/30 L

POOL CHEMICALS

POOL CHEMICALS

WORLDCEM POWDER CL 90 POWDER CHLORIN %90

It provides disinfection and oxidation in pools. It is effective against Legionella. Free Chlorine must be 1-3 ppm in outdoor pools and 1-1.5 ppm in indoor pools. Bound Chlorine must be 0.2 ppm maximum. It performs best between pH 7-7.4.

5/10/20/30 L

WORLDCEM POWDER CL 56 POWDER CHLORIN %56

It provides disinfection and oxidation in pools. It is effective against Legionella. Free Chlorine must be 1-3 ppm in outdoor pools and 1-1.5 ppm in indoor pools. Bound Chlorine must be 0.2 ppm maximum. It performs best between pH 7-7.4.

5/10/20/30 L

WORLDCEM LIQUID CHLORINE

It provides disinfection and oxidation in pools. It is effective against Legionella. Free Chlorine must be 1-3 ppm in outdoor pools and 1-1.5 ppm in indoor pools. Bound Chlorine must be 0.2 ppm maximum. It performs best between pH 7-7.4.

5/10/20/30 L

WORLDCEM PH-L POWDER pH REDUCER

It is used to lower the pH in indoor and outdoor pool waters. The pH of pool water tends to rise constantly. The pH value must be measured and monitored daily. It is effective for the continuation of disinfection and preventing the formation of lime stains. Before use, the alkalinity of the pool water is measured. The measured value must be between 80-120. Then pH measurement must be made. The pH value must be between 7-7.4. At high pH, 1000-2000 gr WORLDCEM pH-L / POWDER pH REDUCER must be added to lower the pH of 100 tons of pool water by 0.1 unit.

5/10/20/30 L

WORLDCEM POLISHER

It is a product that helps filtration. It allows micro particles to be collected and held in the filter. In order to get a good performance from the product, it is important that the pH level of the pool water is 7-7.4. After the application, the filter is cleaned by backwashing. Depending on the external factors (wind, precipitation, vegetation, etc.) and the number of swimmers in indoor and outdoor pools, 1000 ml of WORLDCEM POLISHER is added to 100 tons of pool water 1-2 times a week.

5/10/20/30 L

POOL CHEMICALS

WORLDCEM ALGAE PREVENTANT

It is an effective product against algae. Due to its formulation, it works in harmony with chlorinated compounds. As long as there is no chlorine in the pool, it does not prevent algae on its own, but prevents its formation. In order to get a good performance from the product, it is important that the pH level of the pool water is 7-7.4. After the application, the filter is cleaned by backwashing. It is recommended to use 2500 ml WORLDCEM ALGAE PREVENTION once a week.

5/10/20/30 L

WORLDCEM IONRETAINER

It is used as an ion trap in indoor and outdoor swimming pools. It is used to bind metal ions (such as iron, copper, manganese) originating from raw water and in cases where calcium hardness is high. It prevents metal ions from binding with free chlorine in pool water. The maximum amount of metal ions that must be in the pool water; Iron: 0.3 mg/l Copper: 1.3 mg/l Manganese: 0.05 mg/l

5/10/20/30 L

WORLDCEM PRECIPITOR

It is a liquid material that collects and precipitates particles below 20-40 microns that cannot be adhered to by filtration. In order to get a good performance from the product, it is important that the pH level of the pool water is 7-7.4. After the application, the filter is cleaned by backwashing. Depending on the external factors (wind, precipitation, vegetation, etc.) and the number of swimmers in indoor and outdoor pools, 1000 ml of WORLDCEM POLISHER is added to 100 tons of pool water 1-2 times a week.

5/10/20/30 L

WORLDCEM ALK-L ALKALINITY REDUCER

It is used to reduce alkalinity in the waters of indoor and outdoor swimming pools and contains "Sulfuric Acid". The alkalinity value is also important in fixing the pH value. The alkalinity value must be in the range of 80-120. Ideal pH value for swimming pools must be between 7.0-7.4. In this range, chlorine shows the best effect for disinfection. The alkalinity value is stabilized by automatic dosing.

5/10/20/30 L

WORLDCEM ALK-R ALKALINITY ENHANCER

It is used as an alkalinity booster in the waters of indoor and outdoor swimming pools. The alkalinity value is also important in fixing the pH value. The alkalinity value must be in the range of 80-120. Ideal pH value for swimming pools must be between 7.0-7.4. It is a powder product and easily soluble. It is added in a controlled manner as needed.

5/10/20/30 L

POOL CHEMICALS

WORLDICHEM SAND FILTER CLEANER

It is a product to be used at the beginning of the season and during the season according to the structure of the pool water. The filters of pools that are used intensively become clogged over time due to residues such as body oil and sun oil. Together with the lime in the structure of the water, it sticks to the grains of sand in the filter and causes the filter to lose its function. The product cleans the dirt and lime residues on the sand blocked in the filter without damaging the material. After the quartz-free sand is placed in the filter, the remaining volume is filled with water. WORLDICHEM POOL SAND FILTER CLEANER is added to 10% of the filled water. It is kept for 10-12 hours. At the end of this period, backwash is done. 10-12% WORLDICHEM POOL SAND FILTER CLEANER is used for surface cleaning.
